Summary

Full Stack developer building web applications with SvelteKit, Express, and Postgres with OpenAPI compatible REST APIs. Experienced with self hosting containerized deployments with docker compose. Professional experience with React, Astro, Symfony and Drupal with personal projects in systems programming in C.

Experience

Intern Software Developer (FT - 1 year), zu – Saskatoon, Canada Sept 2024 – Aug 2025

- Engineered features on zu's company website (AstroJS) and Sandbox Mutual Insurance's client portal (Symfony), Saskatchewan Cancer Agency's intranet (Drupal).
- Implemented end-to-end tests with Cypress in AstroJS and Drupal based projects.
- Implemented user onboarding flows and authentication with Symfony, interfacing with the Auth0 REST API.
- Defined security standards for Drupal authentication and assisted with accessibility improvements to meet WCAG 2.1 AA standards.
- Authored internal developer code style and client facing web application documentation.
- Built internal monitoring dashboards to track team github action runner metrics and investigated emerging technologies including Drupal AI implementing RAG and custom generative AI.
- Technologies: PHP, AstroJS, Symfony, Drupal, Typescript, React, Python, GitHub Actions

Education

University of Saskatchewan, B.Sc. in Computer Science June 2026

Graduated with Great Distinction (average > 80%) with a major in Computer Science and a minor in Statistics.

Projects

Cover Letter Templating Web Application

Reusable cover-letter template system with custom template engine. Built to make writing cover letters easier.

- Self-hosted on managed VPS accessible at https://cover-voice.dev
- Implemented a single pass parser with contextual errors and usage tracking of entity relations
- Implemented OpenAPI compatible type safe REST API for secure frontend/backend communication
- Server side pdf generation and replacement of blocks and variables with custom {{ variable }} and {% block %} syntax
- Directed and reviewed AI-assisted implementation work.
- Technologies: TypeScript, SvelteKit, Express, Postgres, Docker

Interpreted Programming Language in C

A gradually typed, embeddable, memory managed, interpreted programming language.

- Implemented pooled Object Management for 36% faster complete program execution in memory intensive applications.
- Implemented slab Allocators for efficient memory allocation and deallocation of memory reducing system call overhead.
- Implemented gradual typing with stack based type system in a single pass compiler.
- Embedding interface based on Wren's embedding API.
- Technologies: C, CMake, Perf, GDB

2D UI Engine in C

A 2D UI rendering engine built on SDL3, focused on layout and event handling.

- Technologies: C, SDL3, CMake

Skills

Languages: TypeScript, JavaScript, Python, PHP

Systems Programming: C, CMake, SDL3, GDB, Perf

Frontend Technologies: Sveltekit, React, AstroJS

Backend Frameworks: Express, Python(Flask, FastAPI), Symfony, Drupal

Testing & DevOps: Git, GitHub Actions, Docker, Cypress, Playwright

AI Tools: Opencode, Codex CLI, Gemini CLI, Cursor

Hackathons

Co-Labs Hackathon 2026 Sept 2026 – Sept 2026

Built a budgeting and personal finance forecasting web application

- Technologies: ExpressJS, PostgreSQL, Sveltekit
- Full agentic development workflow with Opencode and Claude Code.
- Installable progressive web app with service worker and resource caching

Co-Labs Hackathon 2025 Sept 2025 – Sept 2025

Built a home rental platform.

- Technologies: Python(Flask), Supabase, Sveltekit
- Implemented role-based access control
- Implemented maps integration with OpenStreetMap

Co-Labs Hackathon 2023 Sept 2023 – Sept 2023

Built a watch party web application.

- Technologies: Python(Flask), React, Socket.io
- Implemented a real-time chat feature using WebSockets
