Summary

Full stack developer with professional experience developing complex web applications. Strong foundation in React, Sveltekit, Astro, Symfony, and Drupal, balanced out with technical curiosity in systems programming.

Experience

Intern Software Developer, zu – Saskatoon, Canada

Sept 2024 – Aug 2025

- Engineered features on zu's company website (AstroJS) and Sandbox Mutual Insurance's client portal (Symfony), Saskatchewan Cancer Agency's intranet (Drupal).
- Implemented end-to-end tests with Cypress in AstroJS and Drupal based projects.
- Implemented user onboarding flows and authentication with Symfony and Auth0.
- Defined security standards for Drupal authentication and assisted with accessibility improvements to meet WCAG 2.1 AA standards.
- Built internal monitoring dashboards to track team metrics and investigated emerging technologies including Drupal AI implementing RAG and custom generative AI.
- Technologies: PHP, AstroJS, Symfony, Drupal, Python, GitHub Actions

Education

University of Saskatchewan, B.Sc. in Computer Science

June 2026

Graduated with Great Distinction (average > 80%) with a major in Computer Science and a minor in Statistics.

Hackathons

Co-Labs Hackathon 2025

Sept 2025 – Sept 2025

Built a home rental platform.

- Technologies: Python(Flask), Supabase, Sveltekit
- Implemented role-based access control
- Implemented maps integration with OpenStreetMap

Co-Labs Hackathon 2023

Sept 2023 – Sept 2023

Built a watch party web application.

- Technologies: Python(Flask), React, Socket.io
- Implemented a real-time chat feature using WebSockets
- Implemented host video control and synchronization

Projects

Interpreted Programming Language

A gradually typed, embeddable, memory managed, interpreted programming language.

- Implemented pooled Object Management for 36% faster complete program execution in memory intensive applications.
- Implemented slab Allocators for efficient memory allocation and deallocation of memory reducing system call overhead.
- Implemented gradual typing with stack based type system in a single pass compiler.
- Embedding interface based on Wren's embedding API.
- Technologies: C, CMake, Perf, GDB

Skills

Languages: TypeScript, JavaScript, Python, C, PHP

Frontend Technologies: Sveltekit, React, AstroJS

Backend Frameworks: Python(Flask, FastAPI), Express, Symfony, Drupal

Testing & DevOps: Git, GitHub Actions, Cypress, Docker

AI Tools: Opencode, Codex CLI, Gemini CLI, Cursor

Extracurricular Activities

In Medias Res Contributor

Jan 2026

Submitted Poetry, and was selected for the Vol.31 no.1 01/2026 publication of the In Medias Res Magazine.

- Shakespearean sonnet based on the theme 'ChatGPT turns three'
